

# Career Newsletter

## Internships Corner

Many of you are planning to do an internship this summer. Internships vary in shape and duration. Some of them might take you one month, while others might continue all throughout your summer vacation or more.

You can do them in a “PME” environment or you can choose an international environment. You might also want to experience the public sector versus the private sector or vice versa.

However, all internships even the ones you do in the most unheard of enterprises are of endless value. Internships open up your eyes to the reality of the professional world. They help you deepen your academic and theoretical knowledge with a more practical experience. Finally, internships help you identify your career interests and professional aspirations.

In this career newsletter we will dedicate a corner to telling the stories of Al Akhawayn University students’ internships and the different experiences they can go through. Sharing your experience with other students will be for sure of great help to them. So please do not hesitate to get back to us with your internship story (preferably with pictures).

We will be delighted to publicize it.
